

# 11. Contours #2

Now we repeat the first exercise, but without contour lines in the view.

When matching points on the map with points on the ground, use the most obvious features to guide you, look carefully at the heights of points, and beware of adjacent similar features.

## Task 13

There are 6 arrows (labelled A-F) on the map. Which arrow best describes the direction in which you are looking in the view?

## Task 14

There are 6 points (labelled U-Z) on the map. There are also 6 points (labelled 1-6) on the view. Please describe which points on the map match points in the view. Some don't match!
