Agenda Items:

- 1 Revision of ISOM2000
AU reported on the first draft released October 2012 as per Power Point attached.
Printed sheets showing current symbols, proposed symbols and those for consideration were distributed. Considerable discussion ensued. Overall strong opinions against wholesale change ie retain existing and work from that, and also strong opinion against any of the proposed 'stochastic' area symbols and also to a couple of the new point symbols as proposed.
AU made reference to reports of Alex Tarr (paper distributed by Alex) and Eric Andrews about the draft. These Reports to be attachments to Mapping minutes, and to be available on the OA web.

Ken Dowling provided comments on the Printing section of the draft.

Discussion closed after 1 hour due to time restraints.

Agreed that AU to email Revision Team Leader & Map Commissioner on the general consensus against much of what has been suggested or proposed particularly on new symbols for consideration in the Draft document and to attach the reports of AT & EA.
- 2 LIDAR overview presentation by Neil Barr
Neil presented a very informative session on LIDAR and how it was used to map two of the bush maps at this Easter carnival. Neil also organized a self-guided terrain walk and provided LIDAR derived map material. Neil's paper attached.
- 3 NearMap
Nearmap now requires an upfront and expensive License service fee for its Photomaps.
NearMap is investigating ways to make PhotoMaps available to 'non for profit' organizations at an affordable price.
AU to make further representations.

Meeting closed 5.30pm
