

## 11.5 Level 3 Controllers for next 3 years

All Group A events are required to have Level 3 controllers appointed to them, as a representative of and endorsed by Orienteering Australia as per the OA Rules:

- AC 3DAY** 1.1 Orienteering Australia, through the Director, Technical, shall endorse the Organising Body's recommendation for OA Controller at least 3 years prior to the event. In the first instance, this may be a Level 3 coordinator who is technical coordinator for the entire carnival. This requirement applies also to Oceania Championships.
- A** 1.2 For National Orienteering League and all other Group A events the OA Controller shall be appointed by the organising body as soon as possible after the event is announced and shall be endorsed by Orienteering Australia.

For NOL races which are outside a national championships carnival it may be appropriate to have the Level 3 Controller oversee only the elite courses, but they should still have a general knowledge of the organisational requirements detailed in the NOL guidelines.

Level 3 controllers for Group A/NOL events should be notified to the OA Director, Technical for endorsement, as soon as they have been appointed.
